"Transforming Waste into Wellness"

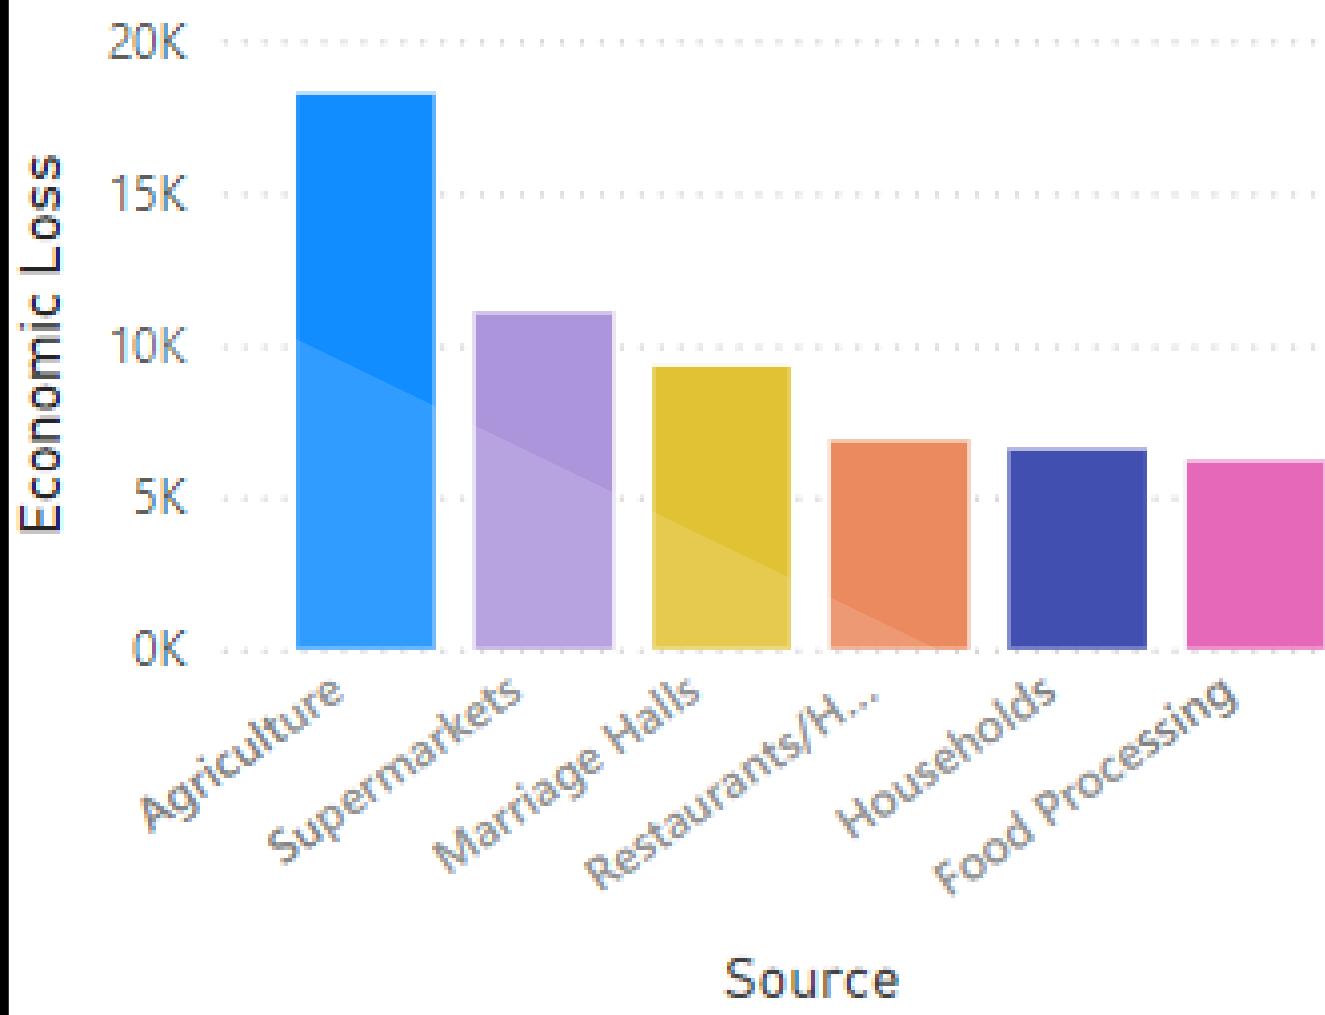

# Pro Planet Person App

By: Tech Buddy

## Economic Loss by Source

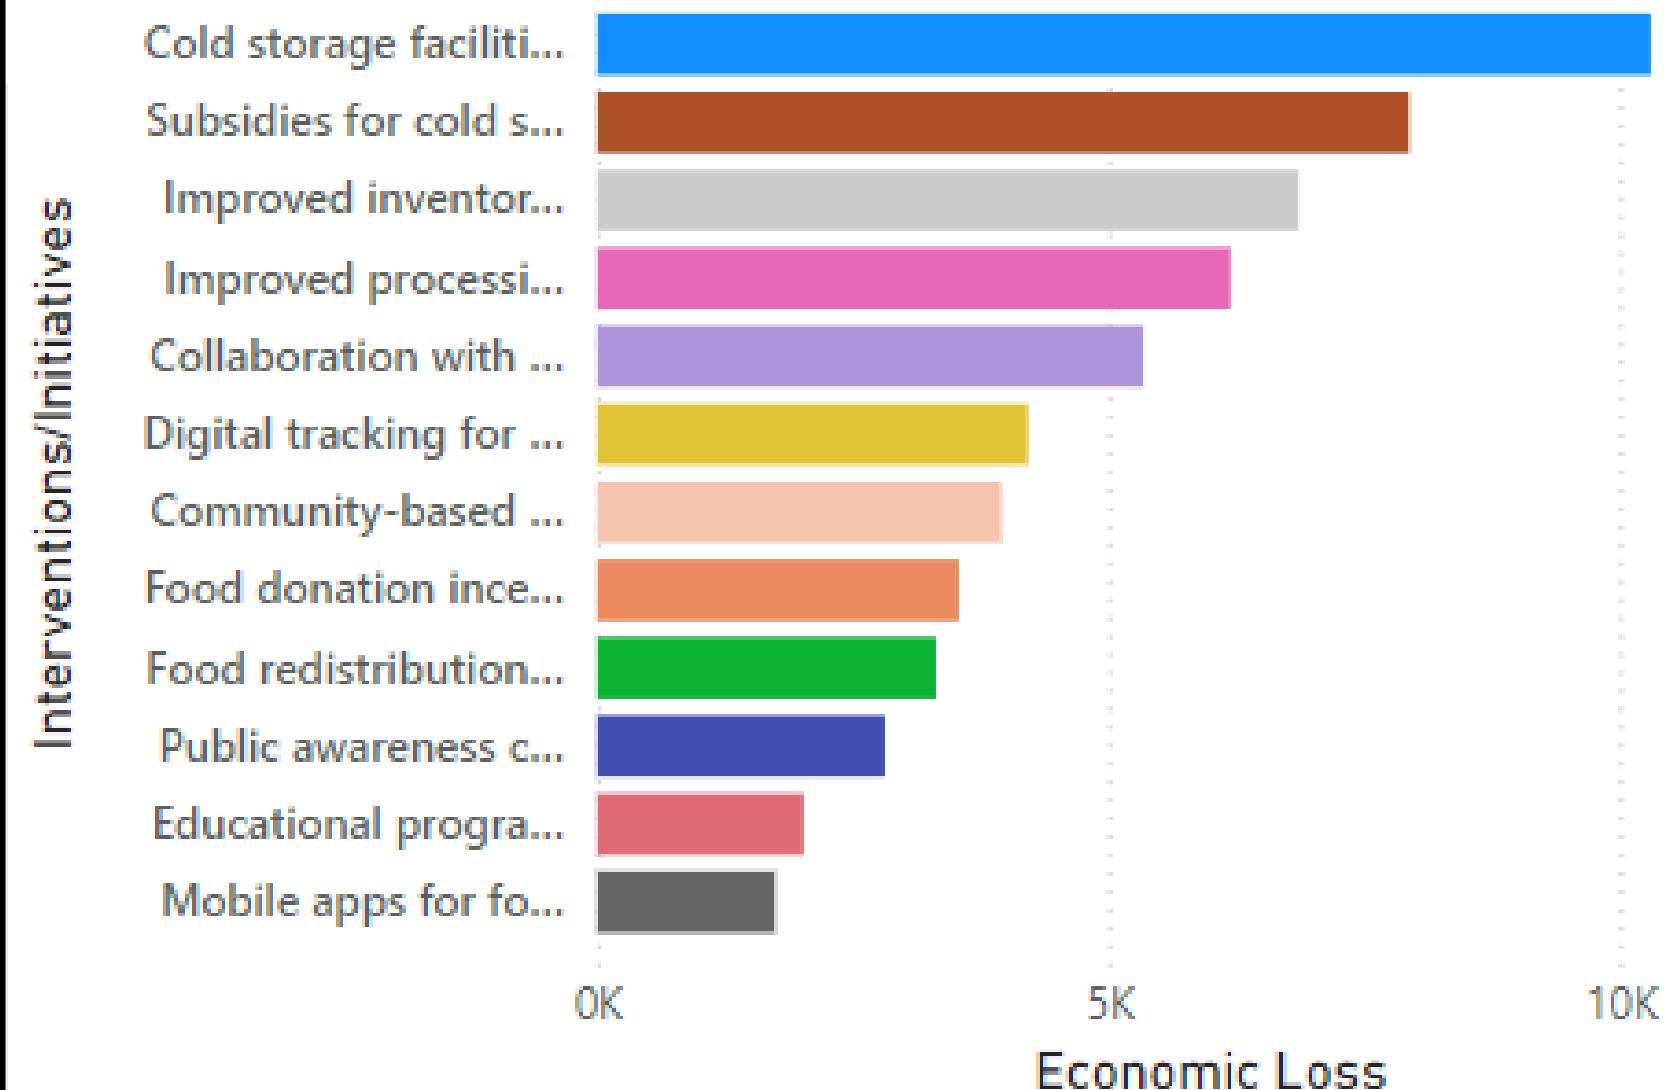

**Urban Food Waste:**  
**One-third of global food production is lost or wasted annually (FAO).**

**Hunger-Related Deaths:**  
**Hunger and malnutrition cause 3.1 million child deaths annually (WHO), worsened by urban poverty and social disparities.**

# STATISTICS

## Real-Time Data

### Economic Loss by Interventions/Initiatives

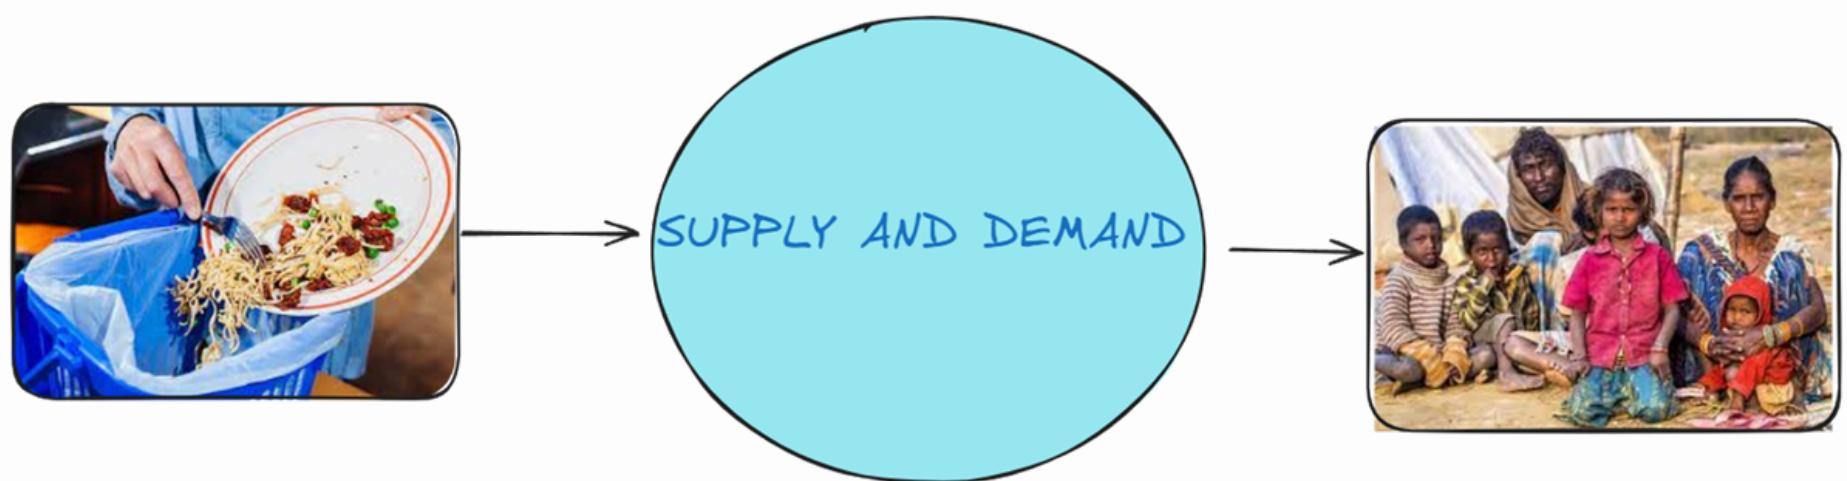

# Problem Statement

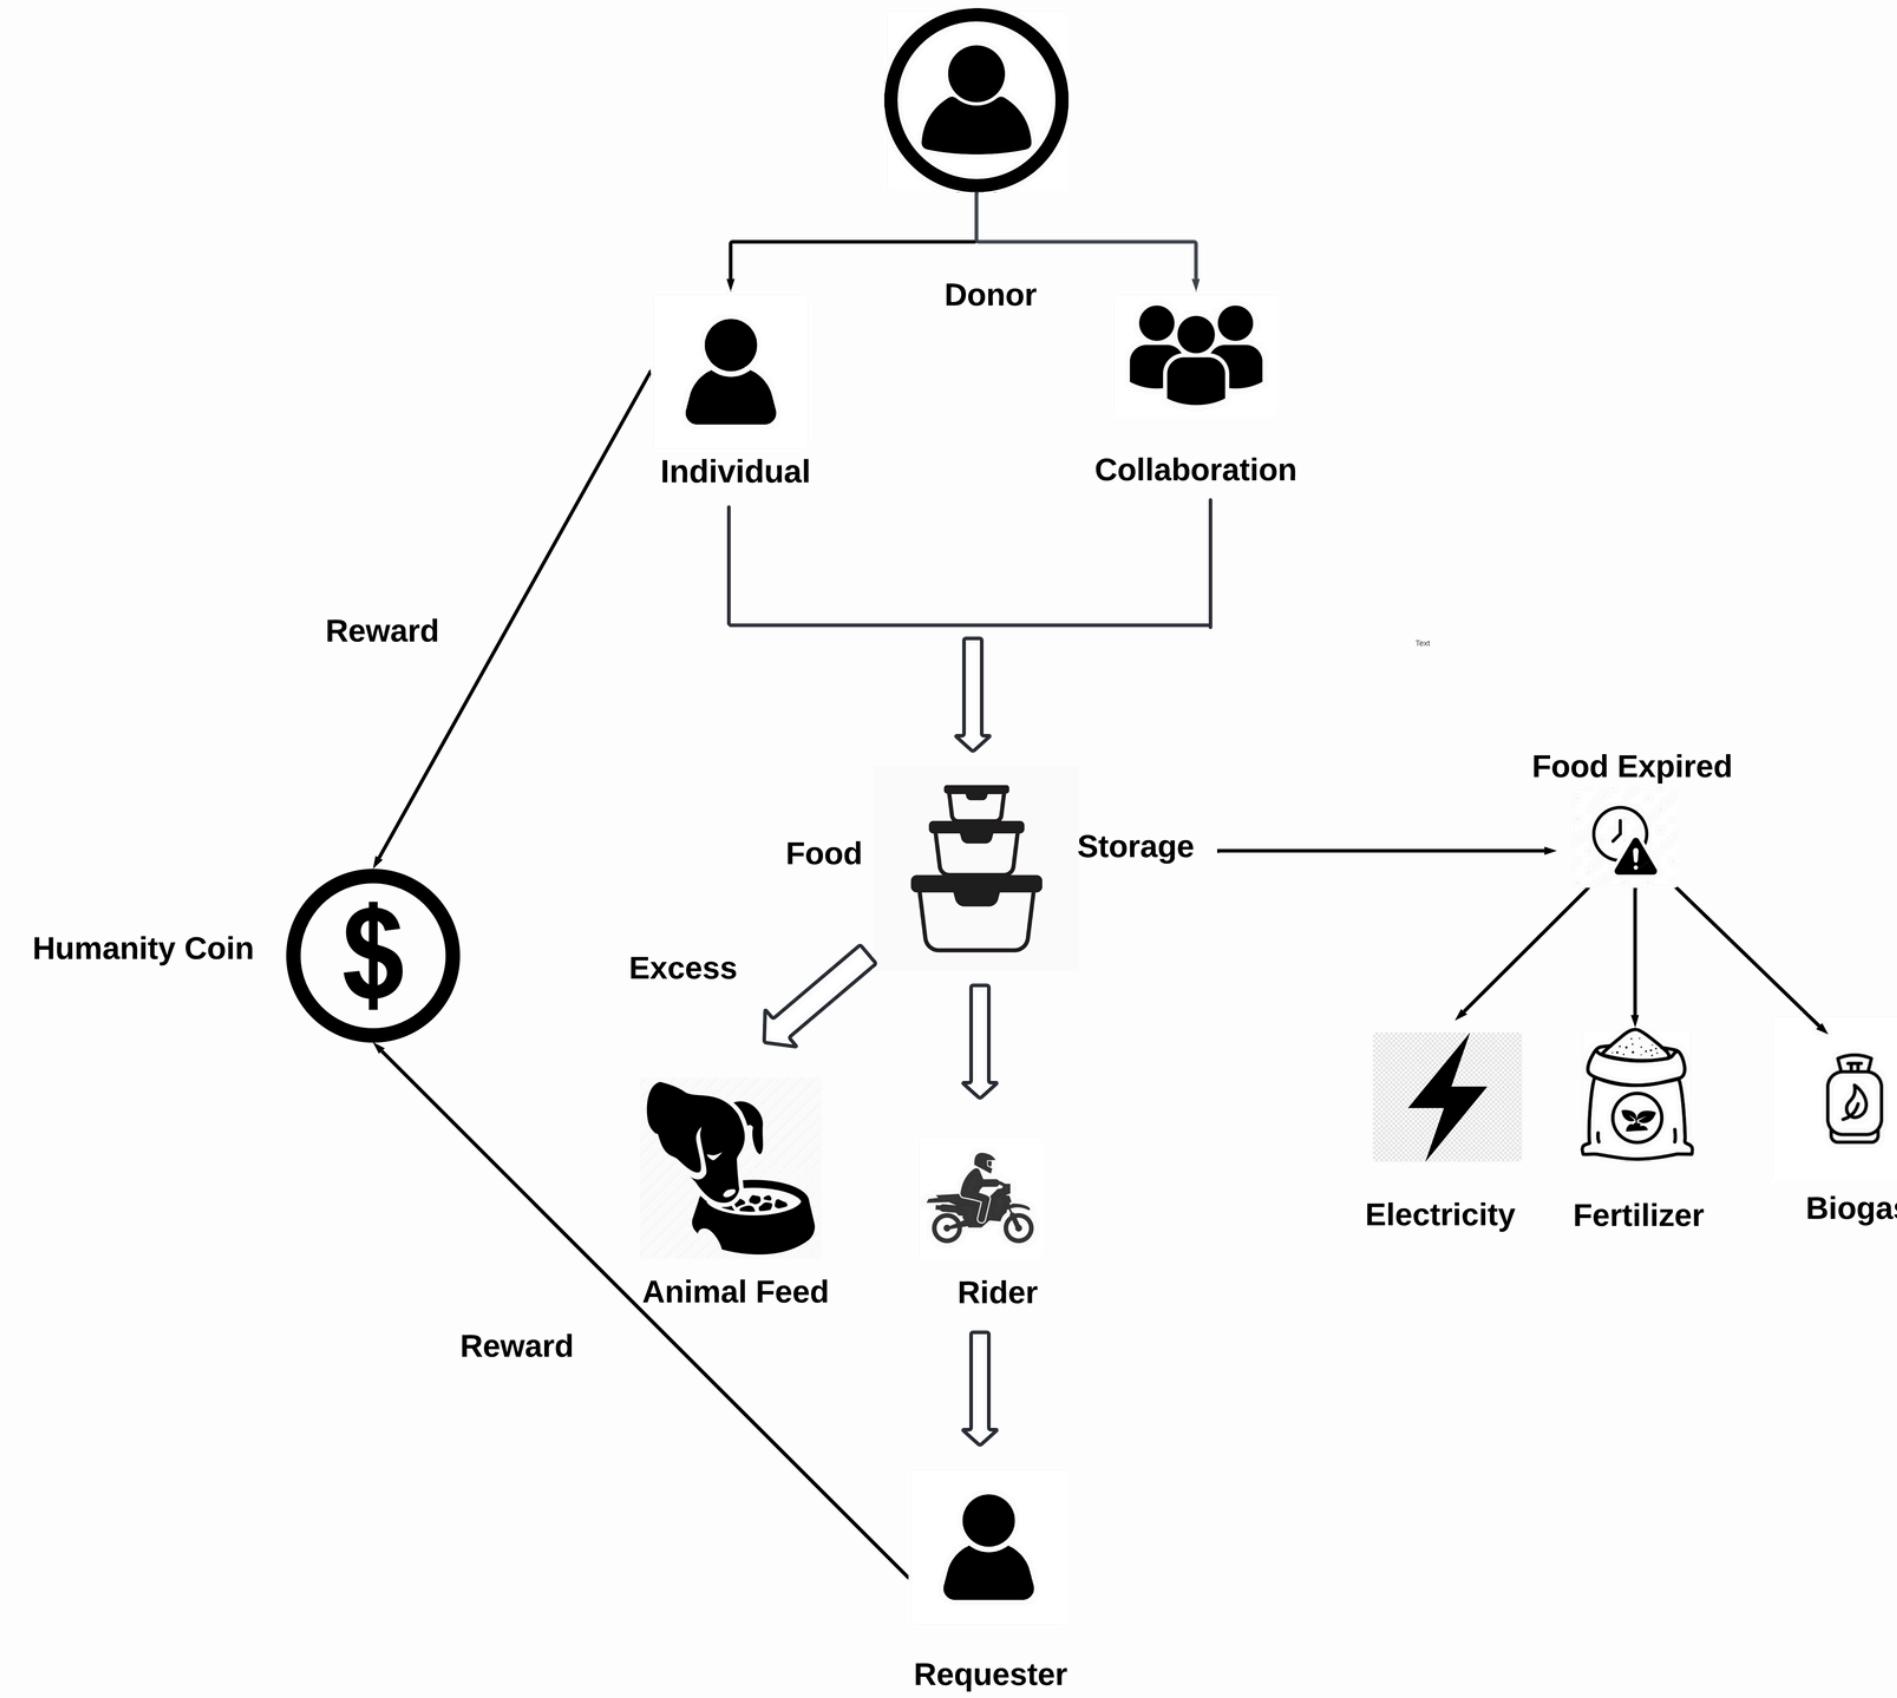

Pro Planet Person App Develop a mobile application that tracks users' activities and nudges them toward sustainable alternatives in real-time. The app should offer suggestions on reducing environmental impact and promote eco-friendly behaviors across various activities like food delivery and online ordering.

# PROPOSED SOLUTION

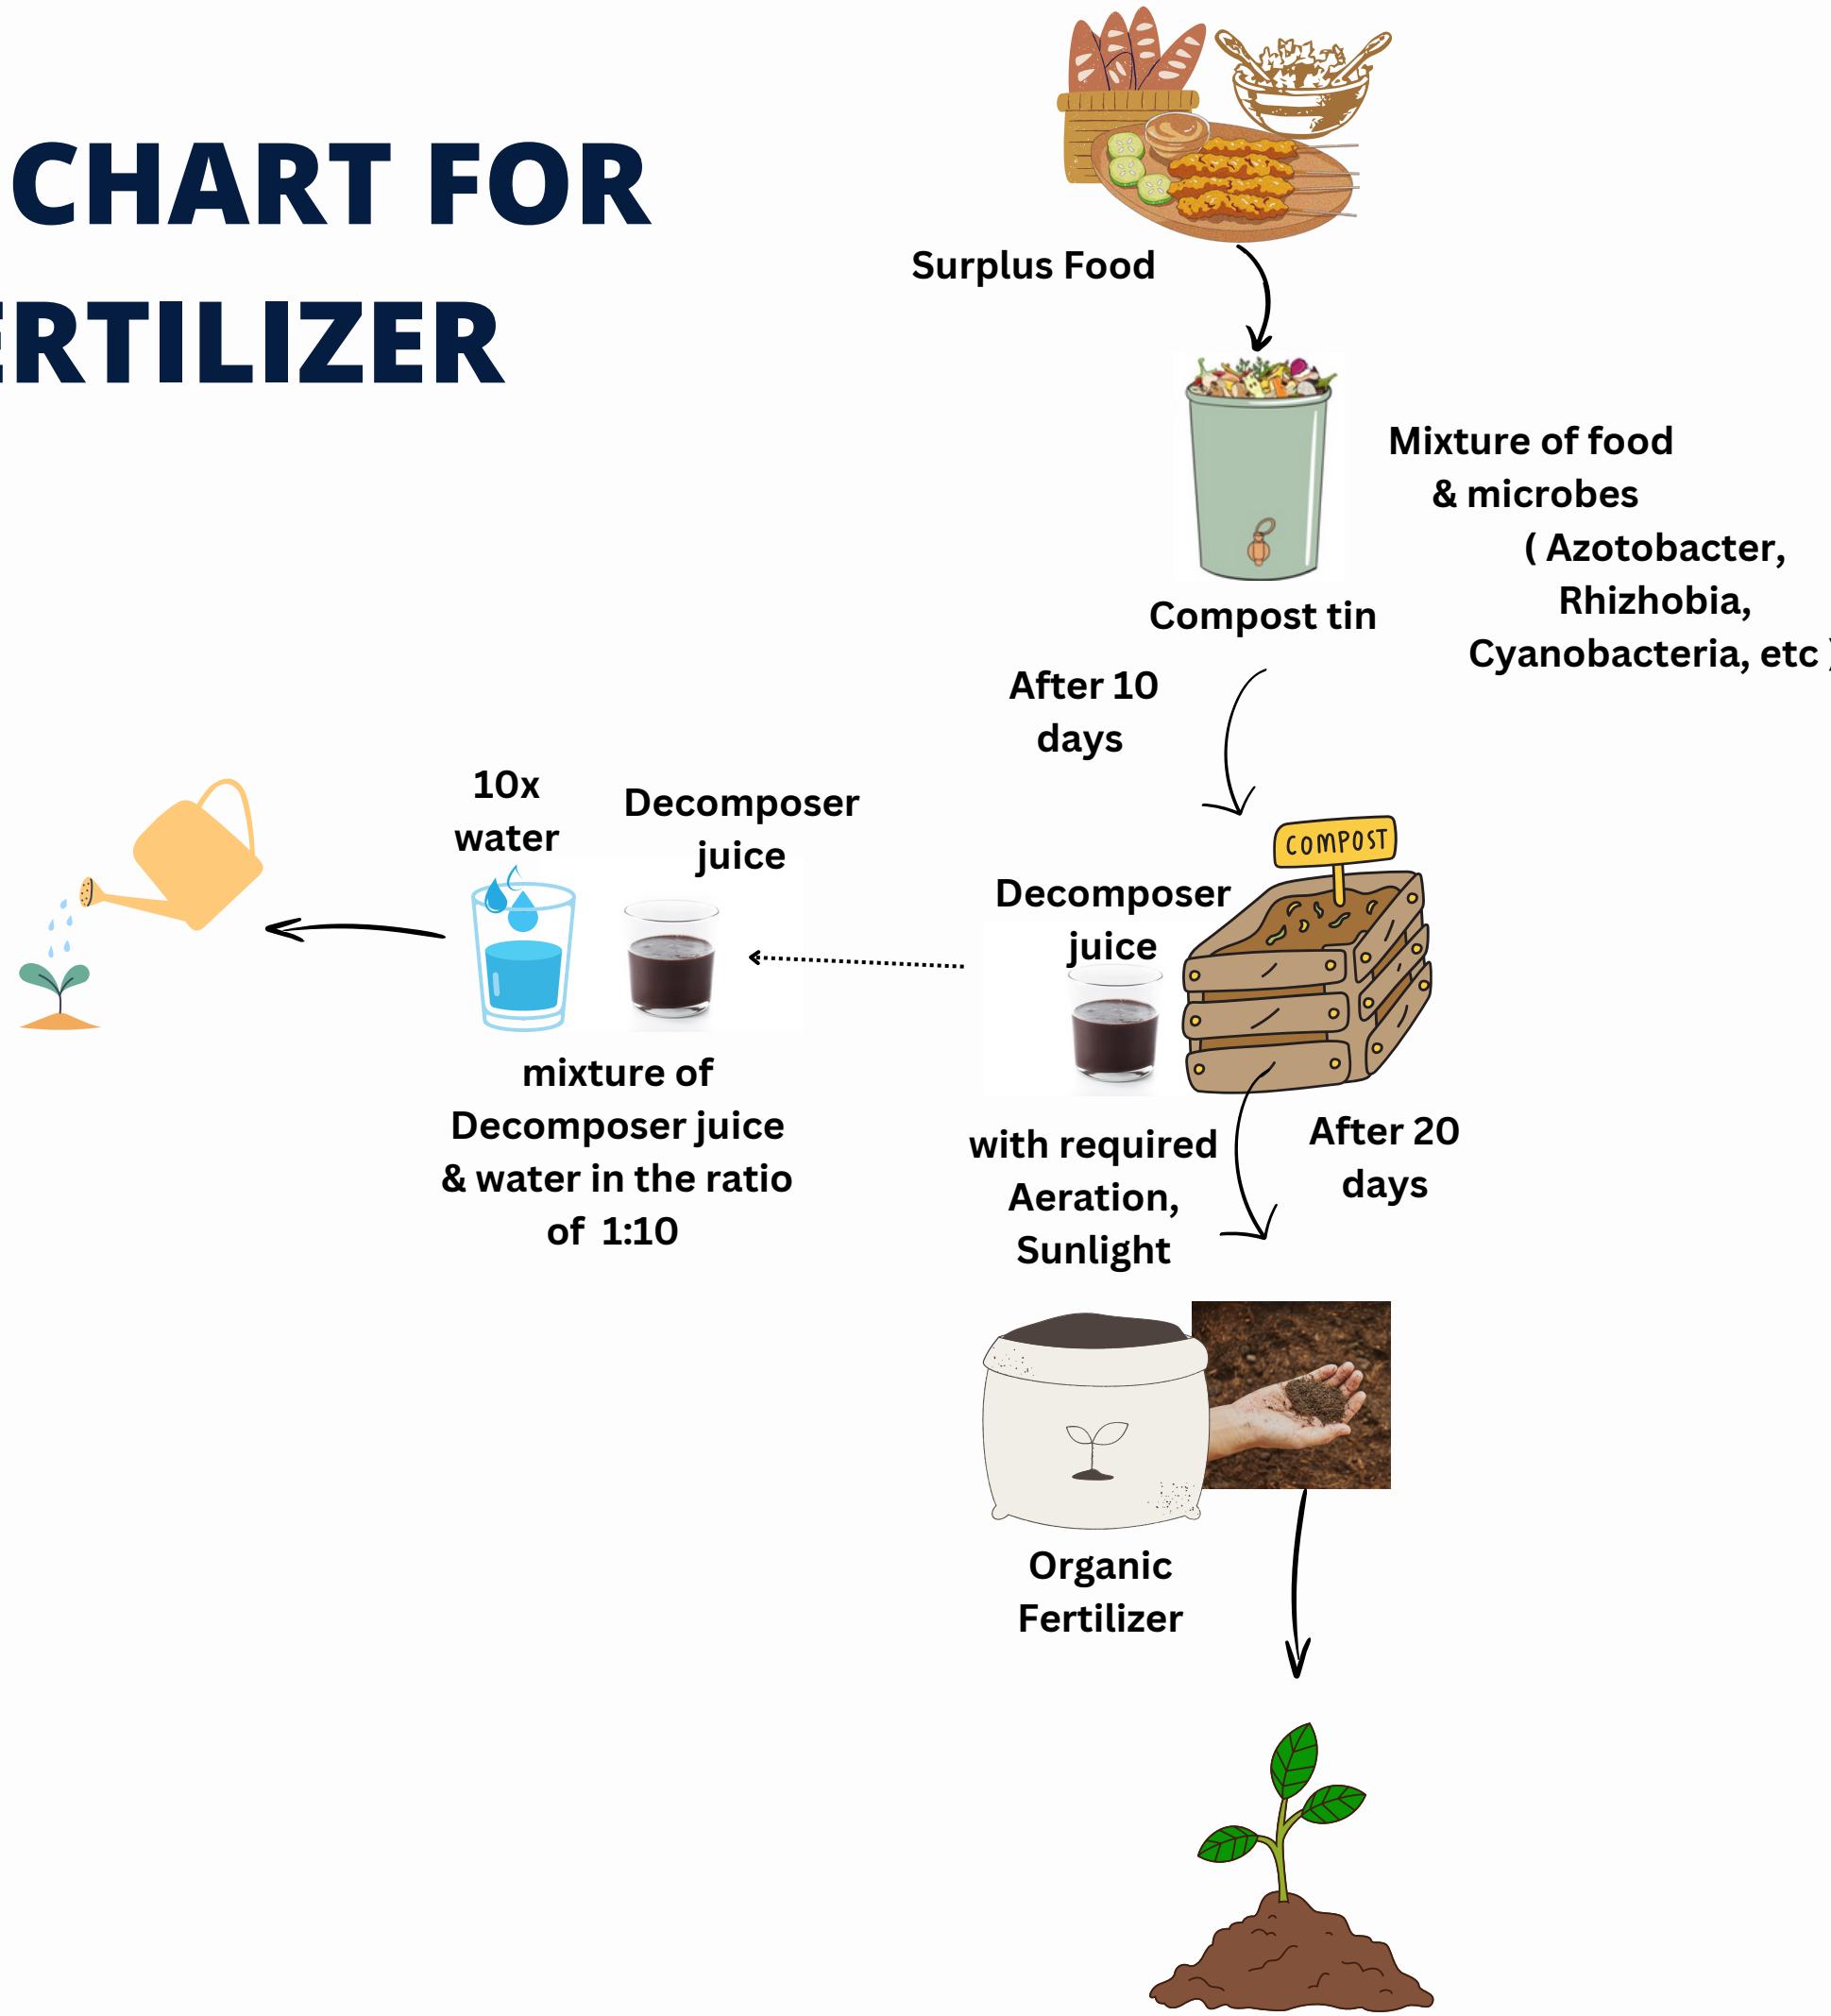

- Mobile Application
- Real-Time Matching Algorithm
- Humanity Coin System
- Zero Waste Approach
- Collaboration

# CASE STUDIES

## SIMILAR APPS:

**These mobile apps connect individuals and businesses with surplus food to people or organizations in need, reducing food waste globally. They operate across various regions, allowing users to either donate, purchase, or distribute excess food that would otherwise be discarded.**

# HOW WE DIFFER

- **Humanity Coin - a digital token rewarding donations with tax benefits, rewards, incentives etc.,**

**zero waste**

- **Fertilizers**
- **Biogas, or**
- **Animal feed**

BIOGAS GENERATION FROM FOOD WASTE

# Business Model Canvas

# USE CASES

## Household Food Donation

Users can list surplus meals for donation, with the app connecting them to nearby volunteers or NGOs for pick-up and delivery.

## Restaurant Food Surplus & Community Events

Restaurants and Event organizers can schedule pick-ups for excess food, which is then collected and distributed by volunteers or NGOs.

## User Feedback & Improvement

Users can submit feedback about the donation process, which helps improve the app's features and functionality.

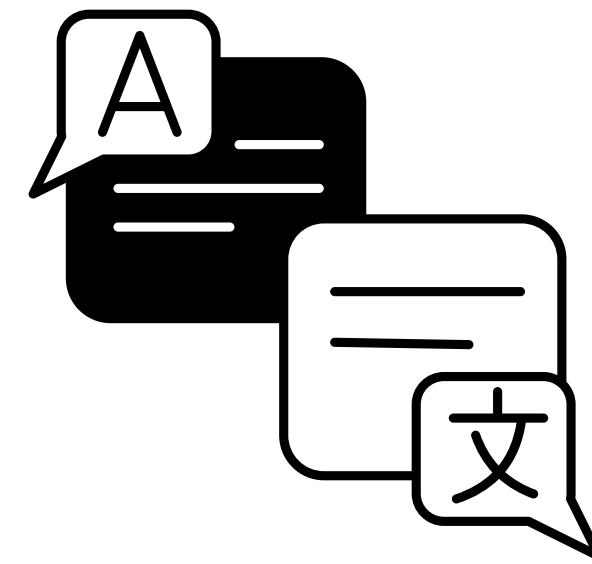

# FUTURE WORKS

**Geographic Expansion to New Regions and International Markets**

**Integration with Other Sustainability and Eco-Friendly Platforms**

**Localization and Multi-Language Support for Global Accessibility**
